21 Dec. 74

Dear Sir.

My deepest apology. Not everithing is gold what glittes. Never have had idea of you in financial troubles after writing half a dozen books. Prosecution of yours could be understandable in a Nazi germany or bolshevick Russia But in U.S. it is unbelievable; Dr. Strangelove runs this country. One thing I can't understand; so many books were written but only the British put it on paper in the JFK "assassination Kit" printed in London. It shows the impossible trajectory of the magic "single" bullet. Exhibit 385 is in flagrant contradiction with other exhibits of the crooked Warren report. So why write books on the subject instead of insisting on this silly picture? Are U.S. born suckers so naive?

I do not intend to write a book on the S.E. spy story. Article in several parts in a magazine will be sufficient. Can be turned easy into movie or T.V. story.

I am looking for a <u>registered</u> historian who can get the File From FBI. I pay the fees in advance. The rest 1/2 and 1/2. Now at present Washington handles the economic, monetary (gold) and budget affairs

shows what kind of nuts are governing us. And if to this Country happens what happened to Russia in 1917 it will not be Moscow but the Wash. garbage pale to blame. All points out to a military/oil adventure in the Near East. It can end not only in oil catching fire but atomic war.

Very truly yours

V. Kolarov

P.S. Please explain the reluctance of all writers to explain technically the magic bullet pirouettes.
